

Kingshuk Chatterjee

Software Developer — Designer

Bhubaneswar, Odisha, India — kingshuk.chatterjee770@gmail.com — +91 91360 74394

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Education

KIIT University

Bachelor of Technology in Computer Science

Member, Software and Research Division (KRSC).

Bhubaneswar, Odisha

2022 – Present

Skills

Languages Python, JavaScript, C, HTML5, CSS3, SQL

Frameworks & Libraries React.js, Node.js, Express.js, Flask, TensorFlow, Pandas, OpenCV

Databases MongoDB, PostgreSQL

Machine Learning XGBoost, CNN, LSTM, Feature Engineering, Time-Series Modeling, Model Training, Model Evaluation

Developer Tools Git, GitHub, REST APIs, Figma, Adobe Suite (Ps, Ai, Pr, XD), Blender, Power BI

Experience

- **Full Stack Developer (Part-time) — Nexveda Technologies** Feb 2026 – Present
Developed a full-stack education platform with React.js, Python, MongoDB, and PostgreSQL. Engineered RESTful APIs for efficient and scalable frontend-backend integration.
- **Frontend Developer — Ionic Design (Freelance)** Apr 2026
Developed responsive web interfaces using HTML, CSS, and Python-based tooling. Focused on clean UI/UX implementation for web-based applications.
- **Frontend Web Developer (Intern) — Nexveda Technologies** Jan 2026 – Feb 2026
Built web-based frontend components using React and JavaScript. Collaborated on UI development and improved application responsiveness.
- **Intern — Indian Oil Corporation Ltd (IOCL)** Nov 2024 – Jan 2025
Worked with industrial networking infrastructure and Cisco protocols, gaining hands-on exposure to enterprise network architecture.

Projects

- **AI Integration in Wearables (Clot Monitor)** [GitHub](#) [Website](#)
 - Developed the SWAT Tier clinical-grade wearable system, utilizing a Bayesian triple-encoder hybrid (CNN-Transformer-BiLSTM) and WGAN-GP data synthesis to achieve 86% Critical Recall in predicting post surgical blood clots.
- **FinReport: Earnings Forecast — ICMLDE Conference Paper** [GitHub](#)
 - Applied NLP-based sentiment analysis and quantitative financial indicators to build a machine learning earnings forecasting model; research presented at the ICMLDE Conference.
- **Krishi Sahayak: AI Agricultural Platform**
 - Built Krishi Sahayak, an AI-powered Flutter agricultural platform with CNN-based crop disease detection and TFLite edge inference, integrating live mandi prices, weather intelligence, and ML-driven sowing recommendations via FastAPI, Supabase, and Firebase improved the application's performance by 70% and 50+ active users in beta testing.
- **Dynamic Gradient Balancing (Physics-Informed Neural Networks)** [GitHub](#)
 - Developed a robust PINN architecture utilizing PCGrad, RAR, and EMA balancers to stabilize Navier-Stokes simulations, achieving near-perfect convergence <1% where baseline models diverged by over 136,000%.
- **Sys Logger** [GitHub](#)
 - Led and developed the complete front end architecture and UI for the system logging platform capable of holding more than 100 active system with real time information.
 - Developed responsive dashboards and monitoring interfaces for system activity.
